

CLARK

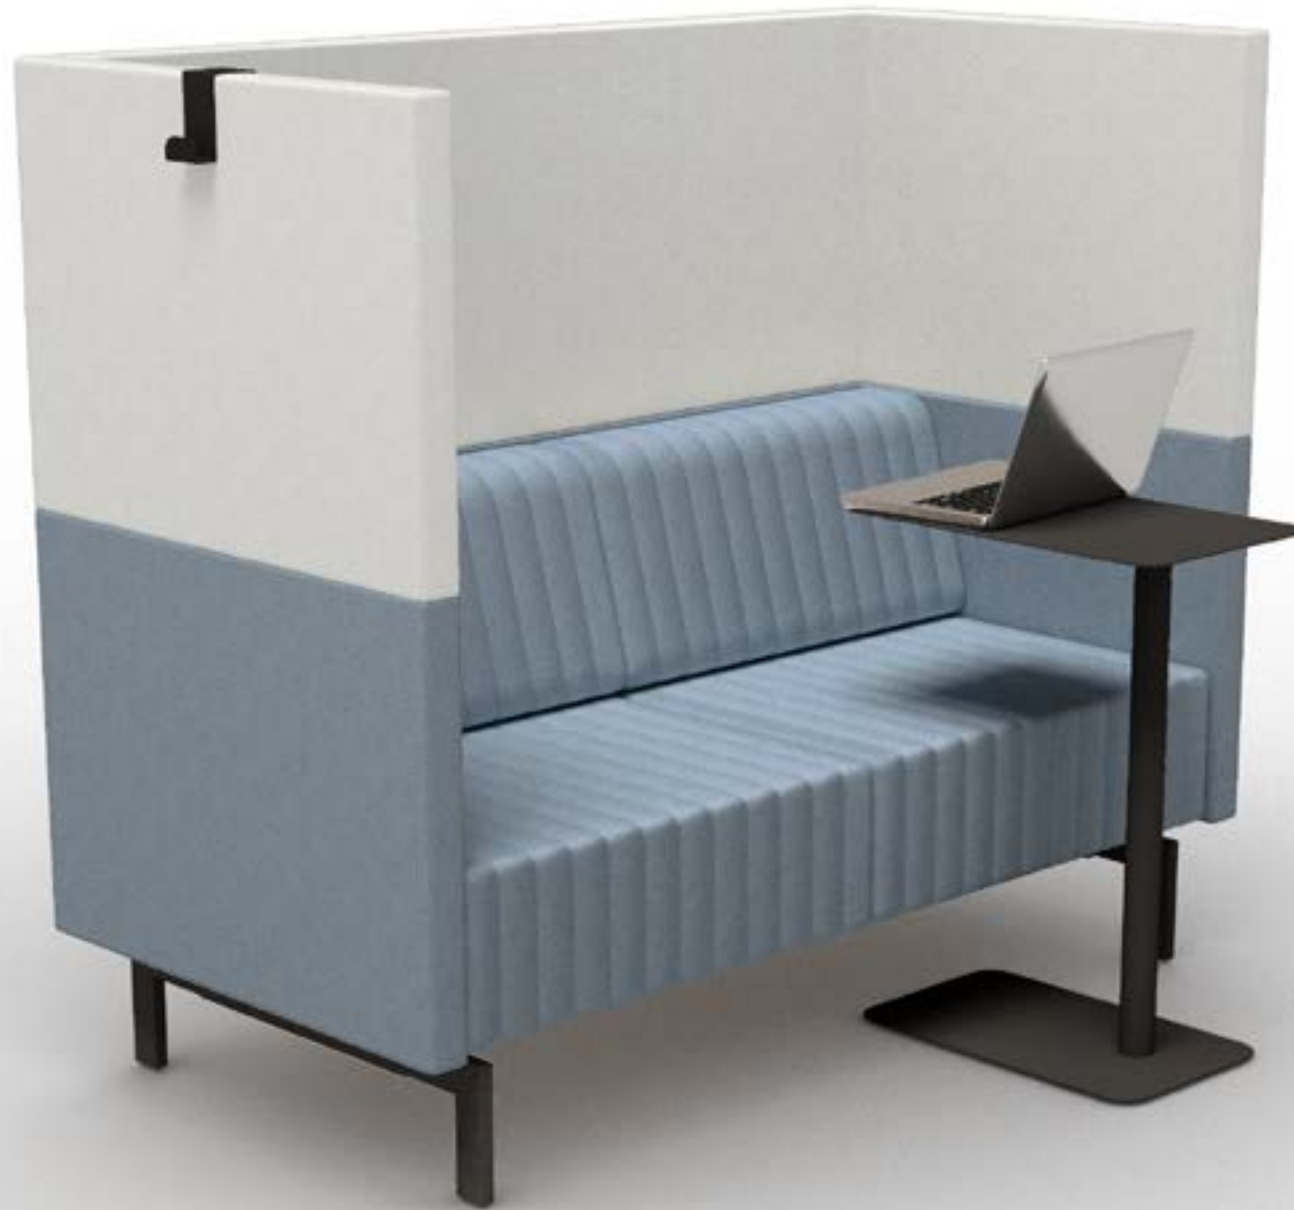

FLEXIBLE ALL-ROUNDER

CLARK is our no-nonsense answer to the most diverse aspects of flexible working. With its straight, down-to-earth and efficient design and performant acoustics it offers a wide scope of solutions, from lounge to meeting pod. The optimal working top fit of the flip-top seater makes it a full size working space in its own right. The stitched pattern in seats and backs prevent from wrinkling and make the range perfectly suitable for public areas. The sofa modules come with powder coated steel or solid oak legs.

CLARK 2-SEATER

- Available with solid oak or powder coated steel legs standard black RAL 9005 or white RAL 9010 (other colours available on request).

ACOUSTIC SANDWICH SCREENS

With a height of 136 cm, the high screens of the CLARK seats offer a sheltered environment with optimum acoustics, ideally suited for concentrated work and informal meeting scenarios.

The sandwich construction made of 2 thin hardboard panels is filled inside with a thick layer of acoustic recycled cotton fiber. The sound waves created by people talking inside a CLARK meeting POD or having a phone call conversation inside a flip-top seater will be fully absorbed by the acoustic fiber inside the screens.

The sound waves can enter the acoustic fiber through the perforations of the inner hardboard panels. The outer hardboard panels will prevent these soundwaves to spread to the surrounding environment.

This benefits the user inside but also the rest of the people working in the same space at the same time.

available with integrated power socket under top

flip-top (left) • with solid wood legs

- LCD screen mounting bracket available on request.

TECHNICAL SPECIFICATION

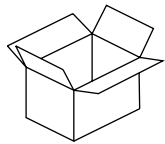

NOSAG SPRINGS

Inside the seats Nosag springs increase the comfort. These metal springs protect the quality of the surface because the flexibility of the foam on top will remain longer and wrinkles in the fabric will be avoided.

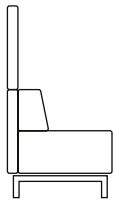

FSC CERTIFICATION

Our production plant is FSC certified and operates with a network of FSC certified suppliers.

KNOCKDOWN TRANSPORT

The feet are packed separately to reduce the volume during transportation. The backrest of the 3-seater High is 'flat packed' to guarantee they fit in the elevator.

USE OF MATERIALS

The carcass is made of chipboard, plywood and hardboard panels. The legs are made of powder coated steel or solid oak wood. The entire product is covered with different types of polyether foam.

FLAMABILITY

All foam in upholstered products is covered with a fire retardant membrane that meets the BS 5852 standard.

UPHOLSTERY COMBINATION OPTIONS

- All the upholstery products of Conceptual are offered in 5 different fabric price ranges.
- All quotations will be based on these 5 ranges. Different fabric ranges can be combined for the same product.
- Special fabrics can be selected on request. For technical support contact our sales department.

OPTIONAL ACCESSORIES
